

EEZY-ROLLER

Introducing the EEZY-ROLLER, a revolutionary product that combines versatility, convenience, and mobility. The EEZY-ROLLER is an ultra-light folding electric rollator, weighing just over 17kg and constructed with high-quality aluminium alloy material. With its compact design, this innovative device can be easily folded within seconds, making it ideal for storage and transportation in planes, cars, trains, and more. The EEZY-ROLLER is not just a rollator; it offers a 4-in-1 function to suit your needs. It can be transformed into an electric wheelchair, mobility scooter, shopping cart, or rehabilitation chair, providing flexibility and adaptability for various situations.

Key Features:

- **Lightweight & Compact:** Weighing only 17kg, the EEZY-ROLLER is easy to manoeuvre and transport. Its compact size allows for effortless storage and convenient travel.
- **Power Assistance:** The EEZY-ROLLER features an electric power assistance mode, providing a boost of power to make your movements even more effortless. Whether you're going uphill or covering long distances, the power assistance feature ensures a smooth and comfortable experience.
- **Airline Compliant Battery:** The EEZY-ROLLER is equipped with a battery that meets the stringent safety guidelines set by airlines. It has been specifically designed and tested to comply with all necessary regulations, giving you peace of mind during your travels.
